How to spot it

The same set of options appears multiple times in a switch or if/else chain.

How to fix it

Replace conditional logic with polymorphic classes.

Before / after example (add screenshots here)

How to spot it

A repeated set of data (fields, parameters, classes) that always appear together. A long parameter list can be a warning sign. Examples: co-ordinates, name, address.

How to fix it

Extract to a class, or a parameter object.

After fixing this, look for Long Parameter List and Feature Envy to solve too.
